

ABC joins forces

with Kyocera Document Solutions Ltd

Meet  **KYOCERA**
Document Solutions

For 60 years, Kyocera has been on a quest to make working spaces smarter by way of innovative and award-winning printers, software solutions, managed services and consumables.

Now they've joined forces with ABC, to help power our managed IT and security service portfolio.

Putting business
at the 'forefront' of
document security

"I'm proud to say that we are now partnering with ABC, and that I would highly recommend them as a Kyocera business partner."

- Kyocera's Sales Director,
Pete Lunn.

SECURITY IN DIGITAL TRANSFORMATION HAS NEVER BEEN MORE IMPORTANT

As digital transformation brings changes and new threats, 60% of businesses with a digital presence could face major service failures in the next two years as their security infrastructure will not be up to scratch.

That's why companies need to consider document security to ensure they do not fall into that percentage. ABC's partnership with Kyocera is key to this. Critical gaps may exist in your imaging, print, document and IT environment. Nothing is safe if your entire infrastructure isn't safe.

So, with backup from Kyocera, ABC will continue its mission of helping customers defend their network with the world's most secure solutions.

“Kyocera’s Partner Channel is extremely important for us so the selection criteria is crucial to our success and brand reputation.”

“When working with partners we look for world class levels of service and who make a point of managing their business relationships in an ethical manner. ABC have always worked with their customers and suppliers in an exemplary way, showing a high level of expertise and professionalism.”

- Kyocera’s Sales Director, Pete Lunn.

SECURE PRINT SELF-ASSESSMENT

IT COSTS NOTHING, AND SAVES YOU EVERYTHING

We want to speak to YOU. It will cost you nothing. ABC will give you a full assessment of how secure your print, document and IT infrastructure is.
