THAT (IN)SECURE FEELING

Do you know who is in your office right now? Or how secure your property, personnel and confidential data is? In our brave new world of cyber security, compliance and GDPR, safeguarding your WorkPlace, WorkForce and WordFlow is essential.

From visitor management, office security to document workflows, ABC connects office technology with security.

DOOR ENTRY SYSTEM (OPTIONAL FEATURE)

Let's securely close the open door policy. How? By ensuring visitors initiate a video call via an external panel. Likewise, entry can be granted by using bio-metric (finger print access), facial recognition and a PIN Code and/or proximity token.

• Intuitive, colour touchscreen internal monitor
• Two designs of the monitor available
• Can be used via handset for private calls or in hands free mode
• Can be wall or desk mounted IP and PoE technology for easy expansion
• No need for specialist wiring diagrams
• Video voice mail option

VISITOR MANAGEMENT

From office staff, remote workers, customers to general visitors, securely track who is on site the minute they walk through your door.

- **Reception console:**
  Full access to your visitor and staff database. For complete control over the protection of data, you can create multiple user accounts with different permission levels.
- **Staff management and time cards:**
  Allow staff to sign in/out easily by either touching their picture or swiping their badge.
- **Events management module:**
  Ability to pre-book visitors into your building for events such as training days or interviews.
- **20" Touch Screen Monitor with Integrated Webcam:**
  Create both temporary and permanent ID cards.
- **Thermal Label Printer:**
  Print off visitor labels in seconds.
- **Full Installation Service and Ongoing Support:** ABC certified technicians install your software, provide staff training and ongoing support.

## CCTV

From reception, warehouse entry, retail to office environments, keep a watchful eye on who is in your business in key locations.

GENERAL OFFICE SECURITY

A complete security blanket for your operations

- **High security technologies**
- **Card IDs/fobs**
- **Biometrics**
- **Mobile access control**
- **Parking security**

DOCUMENT GREATER WORKFLOW SECURITY

The sensitive data which flows along your document, digital and print output is vulnerable to outside forces.
Printers that are connected to your network are as vulnerable to hackers and malware as your PCs and mobile devices.

ABC can optimise and safeguard all aspects of your document workflow.

DOCUMENT SECURITY TIPS:

1. Secure printers and multifunction devices through encryption, user authentication and secure network cards

2. Use a central secured print server so print jobs can only be released from enabled devices with the necessary security clearance

71% OF BUSINESSES ARE SAID TO BE UNPREPARED FOR CYBER ATTACKS.

MEET ABC

Security cuts across all aspects of your organisation. From door entry, visitor management, office security and print and document management, think of ABC as your virtual security guard.

As specialists in audio, visual processes and hardware, we can securely implement and manage everything central to your daily operations.

Why go to other providers when ABC can manage it all?
